To Our Customers and Friends:

In keeping with our policy, we are again offering a catalogue that we feel sure will be of value to its readers. We have spared no effort to make it comprehensive, concise, educational, and interesting.

Our selection of varieties is offered only after careful observation and consideration, and we feel sure our choice will please the majority of specialized glad lovers.

We have been asked to continue the chatterbox review. So again, this season, we will try to evaluate some of the newer varieties we are growing. This review is based on our own observations in the fields at Birchville Gardens. Our soil is sandy and the performance of some varieties may differ in other types of soil or in different climates. We give you this chatterbox review, however, with the hope it will be interesting reading and in some small way assist you in the selection of varieties.

Growing glads is within the reach of all. Those of you who know the joy of good glad growing should now move up to Birchville quality. Our finest and superb bulbs make them an adventure in glad culture.

For the discriminating grower and glad lover, we urge you to look over our SPECIAL COLLECTIONS as well as the NEW VARIETIES which are subsequently listed elsewhere in the catalogue. In the collections you will find the best of the newer and older varieties which, when ordered, come direct from Birchville Gardens to you. Many of our new glads are beautiful creations with personality and sophistication.

Here at Birchville, what the staff would like to have you know is—that old-fashion person-to-person hospitality awaits your visit to our fields and to our ultra modern bulb house. And, of course, we do have the newest drying facilities, the latest in bulb washing, cleaning and sorting machines, as well as everything else connected with bulb culture.

To our old friends, as well as (but particularly) to our new customers, let us say you take no chances. We assure you that each order will meet your requirements. We are sure—and we have every right to boast here—that you will be delighted with our quality bulbs and with our services and prices. If you want top quality or the best, why not get them and treat yourself to the world's most wanted glads.

WHITE—The white section vies with the pinks for supremacy and I believe that in any commercial planting at least 40% may well be made of this popular florists' color. A newcomer, RAINIER, will add strength to this class. RAINIER opens 8 to 10 on spikes of 24 buds and is beautifully ruffled. GLACIER is not only one of the most beautiful but also a reliable variety. Outstanding, as always, are FLORENCE NIGHTINGALE, BOW-BELLS, CARMINE EYES and WHITE SAILS with cutting qualities so much in demand by cut flower growers.

CREAM—The All-America, LANDMARK, is certainly one of the finest show glads. This outstanding cream lived up to all its advance notices. D'ARTAGNAN has vigor, giant size and has a bold blotch. RIXEY continues to produce

tall spikes with beauty of florets matched by no other variety. FLORADORA, LORELEI, GOOD MORNING are all tops as commercials.

YELLOW—YELLOW SPIRE still appears to be the best show variety; grows very tall and bears florets that are beautiful. GARY, still in our opinion, is the best cut flower yellow on the market. FIAT LUX, one of our early favorites, is outstanding in every respect. TOPOLINO, a butterfly variety, has a very contrasting blotch and is exceptionally good. GOLDEN BOY and FALINE are the best of the 300 series. CONRAD is quite late—a good one to finish up the season with. In our opinion, this has been overlooked as it is one of the very best cutters.

BUFF—Some new surprises are in store for lovers of buff gladiolus, though they won't be available until next season. VIVA, a new buff of merit, makes tall stretchy spikes and could rate as one of the tallest glads grown. RIVIERA excels in florescence and will go far with florists for makeup work. COPPERSHEEN and A. B. COUTTS are both wonderful outstanding varieties.

ORANGE—CRONUS, a beautiful deep orange with a golden yellow throat, is very outstanding. GIPSY LOVE, one of the butterfly varieties, has lovely color, grows tall and blooms fairly early. Caballero is one of the most striking novelties. DEBBIE, a true orange, is heavily ruffled and must be grown to appreciate its beauty. TIGERTONE is one of the best 300 size in this color class.

SALMON—SUNBURST is a very unusual novelty that consistently produces outstanding spikes. TABARIN, one of our favorites, is very flashy and a good grower. SALMON QUEEN is exceptionally good as a show glad. PARFAIT, while not too pleasing in color, is outstanding as a show winner. SUGAR ELL and SUNDOWN are varieties that can cut good spikes right down the row. SALMON CRINKLES is one of the most beautiful of the smaller glads plus a wonderful grower.

SCARLET—ALBERT SCHWEITZER, a glowing orange scarlet, is tops for exhibition. FIRECRACKER is a strong contender for the greatest florescence. SWISS FLAG is very flashy. HILLTOPPER and SANS SOUCI, as in the past, are still tops for cutting.

LIGHT PINK—PINK PROSPECTOR has nothing in this class to compare with it, either for exhibition or commercial growing. JILL is early and is one of the finest growers—this, plus beauty, makes it outstanding. CORONATION and BRIDESMAID both are outstanding cut flower types. TEMPTRESS and TARGET, both tall growers, can easily win at the shows. TAMMY and DIMPLES will rate with connoisseurs who love smaller glads.

MEDIUM & DEEP PINK—PINK SENSATION is still tops in this color class. It consistently produces tall spikes with 8 to 10 open—well liked by florists. PINK FAVORITE, deep pink and large, also grows tall with 8 open. COUNTESS, one of the best cutters late in the season, throws tall spikes.

Early blooming makes FRIENDSHIP valuable as a cut flower—has good color plus ruffling. ROYAL LADY, a pleasant surprise find in 1960, is one of the best from Holland.

LIGHT & DEEP RED—My first choice for an all purpose red goes to RED PEPPER because it is so consistent that nearly every spike is of show caliber. INSURPASSABLE is very early and nearly 100% cutter of tall spikes. REDCOAT possesses unusual beauty of color and should have no difficulty winning at the shows. RED TAPE and RED RADIANCE are older varieties that are reliable as cut flowers.

BLACK RED—OSCAR, with its tall spikes opening up to 10 with flaring blooms, is one of the best European releases. DARK BRILLIANCE excels in ruffling and has a good dark sheen. NEGRO BOY is one of the best black red varieties. ACE OF SPADES gives the artistic touch to this group and is deepest of all and nearest to true black.

LIGHT & DEEP ROSE—A new variety, ROSEDENE, bears watching for it has good color, is heavily ruffled and is very early which should make it a leading commercial. GINA, as usual, was outstanding. This stellar variety cuts right down the row and has color few varieties can equal. GIPSY ROSE is one of the finest show glads as well as a top notch commercial. This will become extremely popular when the price is lower. FATHER STEVE is flashy and catches the eye. CORAL ROSE, one of the top show glads, is capable of opening 10 with the rest of the buds showing color.

LAVENDER—My first choice for an all purpose glad in this color class goes to GIGI—a beauty that is very consistent in making good spikes right down the row with 8 open. CATTLEYA has florets that are extremely ruffled and attractive and is a top show glad. MAD HATTER grows very tall and has very unusual color of rose lavender. In our opinion, PADION is one of the finest early varieties. PRINCESS, CAMPANILE, ELIZABETH THE QUEEN and GAIL are reliable commercial varieties.

PURPLE—KAREN is a most attractive purple. It is distinguished by long flowerheads and wonderful keeping qualities. KING DAVID has nice ruffled florets and is a top contender at any show. We like the rich color of VALOR—always a favorite here. THE RAJAH and MABLE VIOLET are unsurpassed for cutting.

VIOLET—BLUE LOU seems to be one of the best, has wonderful color and has performed very well in its first year. BLUE PACIFIC makes tall spikes with 7 open; has a nice sharp blotch and shows great promise. BLUE VEIL is one

of the tallest and is a good cutter. BLUE CONQUEROR, BLUE PETER and SALMAN'S SENSATION are all reliable producers of commercial blooms. BLUE DEVIL is a very unusual novelty that always draws a lot of attention.

SMOKY—BLUE SMOKE is one of the most beautiful. RIM-ROCK shows promise of being one of the very best with uniform spikes right down the row. COMANCHE CHIEF is always spotted first by garden visitors—has unusual beauty of color. ORIENTAL SPLENDOUR and VANITY FAIR will please those who want their glads different. Both are very popular and are worthy of a trial in your 1961 garden. TANGLO is still tops as a show variety, opening up to 10 easily on perfect spikes. BROWN LULLABY, PRUNELLA, MAGIC BEAUTY and COPPER LUSTRE will please you. We are sure all these are outstanding and unusual.

It would be impossible to conclude these comments without a word about the green glads. Green Ice will certainly be grown by the million just as soon as stock is available. Shamrock, while not so green, is very early and is a good grower that should be valuable for early cut flowers. Green Woodpecker opens 10 easily and is certainly going to be hard to beat at the shows. I will conclude these comments with reference to the Butterfly Varieties from K & M. Their rich color and bold blotches will endear them to your heart and bring added joy to your 1961 glad garden.

In the foregoing paragraphs we have endeavored to give you an honest, concise appraisal of some of the newer varieties as well as the best recent introductions. We often wonder whether non-productive pages (pages not containing price lists) are of any value to a catalogue and its mission. To this there is no conclusive answer, but we have long felt that interesting and instructive reading, together with good pictures and service features, are just as much a part of a successful catalogue as the actual price lists themselves. We certainly would like you to express an opinion as to whether or not we should continue chatterbox review each season.

Our sincere wish is for your success and happiness in your 1961 garden.

Sincerely,

James A Milo

A Gift to You

This catalogue we send to you with our compliments and we are glad to do this. Each year we try to improve upon its attractiveness, as well as to give you the latest up-to-date information.

But, like all good things, it costs a considerable amount of money to print thousands of catalogues each year; even more than you can perhaps imagine. Now our records show we do not receive an order from every person in our files every year, nor do we expect this. However, we would appreciate receiving an order, even though it may be small, every second year or so. Some people are just catalogue collectors, some take up other hobbies and still others are forced to give up gardening for some reason or other. These we must eliminate from our files if we are to practice economy necessary to sound business.

So, if you like our catalogue and wish to continue receiving future copies, either send us an order, or mail us a postcard, stating you are still interested. To our many friends and customers, who through their loyal patronage have made this catalogue possible, we extend our sincere thanks and appreciation.

NEW INTRODUCTIONS FOR 1961

XANADU (Baerman-Milo '61) 470-85

(Caribbean x Admiral)

Looking for novelties? Here is an improved Blue Devil that will attract plenty of attention in your garden or in your exhibit at a glad show. Xanadu grows about 55 inches and throws a flowerhead holding 18 to 20 buds with 7 to 8 open. The uniquely blue-blotched deep violet blooms are well formed and seem to signal to one from afar. In our fields they seem to hold a viewer's attention. Recommended for those who like something different.

STANDOUT (Baerman-Milo '61) 534-90

(Southern Belle x Sweet Sixteen)

An outstanding beauty, this lovely creation is for the fastidious glad lovers and growers who appreciate the very best. A new conception of steadiness, strength, and elegance. The achievement of excellent esthetics and unmistakable supremacy is a tribute to the diligence of the hybridizer. A connoisseur's choice with unmistakable supremacy. Color is deep salmon-pink with an inconspicuous lighter throat. The blooms are 6 inches across but look even larger because of their roundness. With 10 open and plenty in color out of as many as 29 buds on a 5 foot spike, this really is a standout. Rapid propagation makes possible a modest starting price for a wonderful variety.

GOLDEN STAR (Baerman-Milo '61) 416-75

(Prospector x Golden Sunshine)

The coupling of two yellows—Prospector and Golden Sunshine—materialized in Golden Star and incorporating in it the finer qualities of both parents, making this a significantly better glad than either of them. This variety is a new concept in glad culture that will benefit both glad fans and growers. A medium deep yellow that is tall and stately with florets of heavy substance and exquisitely ruffled. This is an unusually distinctive beauty with a very attractive starry effect. The spikes are tall, having 20 to 22 buds and 7 to 8 open with fine attachment. Should be an excellent commercial.

RED HEAD (Baerman-Milo '61) 446-80

(Prunella x Southern Belle)

There is so much to please you about Red Head, one of the most satisfying glads you ever tried. Serenely smooth in texture and incredibly gratifying color combinations adds a refreshing hint of new beauty and lusty stamina to this color class. The plants are tall, vigorous and healthy and sport a long 36 inch flowerhead on which are borne 22 to 24 buds with 10 open blooms. The florets are spectrum red with a small white throat. Plants are vigorous and spikes can easily attain a field height of 65 inches or more. A superb cutter. Put this on your "must" list. Strongly recommended.

GOLDEN TRUMPET (Baerman-Milo '61) 416-90

(Golden Sunshine X Prospector)

Lightly frilled medium-deep yellow with a narrow buffy edge. Almost a self. The most rampant grower among yellows that I have ever seen. Even the bulblet foliage was four feet tall. An all-around good yellow, stalwart and well-mannered. You can't beat this for propagation, hence our very modest introductory price. Growing Golden Trumpet will give you an emotional experience never known to you before. No other glad offers you so much or gives you such adaptability. After the calm, following the emotional experience, you suddenly realize, here is that superb glad!

ETERNAL CITY (Baerman-Milo '61) 470-85

(Violet Charm & Innocence)

You'll love the dramatic beauty of this glad's exciting color tones. You can't imagine how glorious this glad can be until you have grown it and seen it! Words can only hint at its beauty and the elegance of the blooms with the precise tailoring effect of the petals. You, too, will luxuriate in its new look. Eternal City is a good grower—55 inches or better and healthy. The flowerheads are nice, bearing 18 to 20 buds with 8 open. Blooms are medium blue with a white throat. Florets are needle-pointed and daintily ruffled. This blue should have unusual cut-flower appeal. Fine also for planting among perennials, where its blue spires remind one of delphiniums. Good propagator, but stock is still limited.

Grower's Unit: 1 Lge., 2 Med., 3 Sml., 50 Blbts., 22.50.

BETHLEHEM (Baerman-Milo '61) 400-70

This majestic variety grows up to 55 inches tall or better. It never fails to produce a good spike on which 18 to 20 buds are cuddled, having 8 open and several more in color.

The ruffling and roundness of the blooms make this an outstanding glad and of great value to the florist. Although somewhat similar to White Friendship, we find it larger and more ruffled. Because it is early and beautiful, this variety should be in great demand by cut flower growers.

Lge., ea. 1.50; Med., 1.00; Sml., 50c; 15 Blbts., 1.00.

Grower's Unit: 1 Lge., 2 Med., 5 Sml., 50 Blbts., 7.50.

TIPPY TIM (Baerman-Milo '61) 201-80

(Caribbean & Ares)

This little cutey-puss is one of the finest miniatures. Growing in the fields, the long rows seem to remind us of the red lights along the "Gav White Way". The plants are healthy and vigorous. The flowerheads are sturdy, bearing 18 to 20 buds with 6 to 8 pert 200-size florets open. The blooms are beautifully ruffled and are set off by orchid-like purple blotches. Tippy Tim's versatility lends itself to many floral arrangements and should be in great demand by ingenious and artistic florists. If you like miniatures, you will like this eye-full, saucy-looking midget. Stock still limited.

Each—Any size, 2.00 or 1 Bulb and 10 Bulblets, 4.00.

TANARAMA (Seher '61)

491—Pirate Cache X Unknown

Most of the smokies are a fusion or blending of the grey, tan or brown tones. In Tanarama we have a beautiful, clear, clean, light tan with a cream throat. Tanarama opens 6 lightly ruffled blooms on a 22 bud spike which is up to 5 ft. tall. It is extremely healthy and a most wonderful color for arrangements. Tanarama won the American Home Achievement Award at the N.E.G.S. Show at Framingham, Massachusetts, this past summer. It has never rated below "B" the few times shown as a seedling. We think Tanarama is one of the most beautiful of all smokies and a superlative decorative glad.

Each—Any size, 3.00 or 1 Bulb and 10 Bulblets, \$6.00.

SUNNYDALE (Baerman-Weeks '61) 416—Late

(Golden Sunshine x Prospector)

We wanted to name this classy ruffled medium deep yellow "Gold Lace" because of the lacy quality of its ruffling, but found the name unavailable, so it became "Sunnydale". Spikes are fully 60 inches tall with up to 25 buds—unusual for a yellow. This looks like an excellent cut flower. Strongly recommended.

Lge., ea. 1.50; Med., 1.00; Sml., 75c; 15 Blbts., 1.00.
Grower's Unit: 1 Lge., 2 Med., 5 Sml., 75 Blbts., 11.50.

**PURPLE SPLENDOR (Baerman-Weeks '61)
466—Midseason—Late**

(King David x Royal Stewart)

This unusually stretchy purple self looks like an improvement on King David. It is a little less of a red-purple than the latter and more of a true purple. Attractive ruffling and velvety texture make this a very luxurious flower. Good purples are scarce and we think you will like this one. Thirty-inch heads with 23 buds are typical.

Lge., ea. 1.00; Med., 75c; Sml., 50c; 20 Blbts., 1.00.
Grower's Unit: 1 Lge., 2 Med., 6 Sml., 100 Blbts., 7.50.

**GOLDEN PHEASANT (Kroon-Weeks '61)
424—Midseason**

Golden-orange is a rare hue among glads and a very beautiful one. Florists, especially, love this "autumn color" because it blends so well with chrysanthemums. Don't fail to get in on the ground floor with this very promising cut flower.

Lge., ea. 1.00; Med., 75c; 1 Lge. and 10 Blbts., 2.00.
Grower's Unit: 1 Lge., 2 Med., 4 Sml., 50 Blbts., 7.50.

**BLEEDING HEART (Baerman-Majeski '61)
401—Early**

(Seedling x Seedling)

This happily-named white with snappy scarlet blotch surrounded by an eight-inch band of clear yellow is an excellent novelty which should prove immensely popular. Bleeding Heart opens eight or more blooms with formal placement on precisely perpendicular stems. A heavy bloomer from bulblets. Excellent propagator.

Lge., ea. 1.50; Med., 1.00; Sml., 50c; 15 Blbts., 1.00.
Grower's Unit: 1 Lge., 2 Med., 50 Blbts., 7.50.

**GOLDEN ROSETTE (Baerman-Majeski '61)
416—Late**

(Golden Sunshine x Prospector)

This is the tallest and largest yellow from this originator. In 1959 we had Golden Rosette 72 inches tall, with as many as 11 beautifully ruffled wide-open, waxy florets open at a time on 21-bud spikes. Golden Rosette is a tremendously impressive yellow destined for great popularity. Highly recommended.

Lge., ea. 2.00; Med., 1.50; Sml., 1.00; 10 Blbts., 2.00.
Grower's Unit: 1 Lge., 2 Med., 5 Sml., 50 Blbts., 12.50.

**BLUE RIBBON (Baerman-Majeski '61)
370—Early-midseason**

(Innocence x Caribbean)

This 24-bud medium-light blue opens a real ribbon of blooms on spikes about 60" tall. Its spire-like flowerheads remind one of delphiniums and it should be a good glad to plant in groups among perennials. Blue Ribbon never flecks. Some cut flower growers report a demand by florists for these newer and bluer blues.

Lge., ea. 1.00; Med., 75c; Sml., 50c; 20 Blbts., 1.00.
Grower's Unit: 1 Lge., 2 Med., 5 Sml., 100 Blbts., 7.50.

**CLIMAX (Baerman-Majeski '61) 450—Midseason
(Innocence x Caribbean)**

This ultra-regular rose pink with beautiful round florets shares a trait found in many prime cut flower varieties: bulbs of the same size all bloom simultaneously, making a row an impressive sight and facilitating quick cutting. Many garden visitors snapped a color picture when they came to this one! 23 buds; 63" tall.

Lge., ea. 2.00; Med., 1.50; 1 Lge. and 10 Blbts., 4.00.
Grower's Unit: 1 Lge., 2 Med., 3 Sml., 50 Blbts., 12.50.

**ABIQUA (Baerman-Majeski '60) 480—Midseason
(Southern Belle x Innocence)**

A supremely beautiful smoky of heavy substance and superb ruffling. Color is light rose overlain with a distinct silvery sheen—a real changeable-silk color. This is one smoky that deserves the adjective "exquisite". Highly recommended.

Lge., ea. 1.50; Med., 1.00; Sml., 60c; 100 Blbts., 9.00.
Grower's Unit: 1 Lge., 2 Med., 5 Sml., 50 Blbts., 9.00.

**HENNA (Baerman-Weeks '60) 296—Early
(Statuette x Unknown)**

Probably the most unique miniature ever introduced. Very oriental-looking in its chocolate brown coloring with henna tips and midribs. (Color is far more novel than our picture shows.) Will open up to 11 at once. A supreme novelty for arrangements. Don't overlook this delightful miniature.

**Lge., ea. 1.00; Med., 75c; Sml., 50c; Blbts., 10 for 1.00;
100 for 8.00.**

Grower's Unit: 2 Lge., 4 Med., 8 Sml., 100 Blbts., 13.00.

**BLUE LAKE (Baerman-Weeks '60) 470—Midseason
(Innocence x Caribbean)**

The blue that is due to supplant Caribbean because of its greater blueness, larger size, and trimly tailored spikes. Nice ruffling and starchy midribs give Blue Lake lots of character.

**Lge., ea. 1.00; Med., 75c; Sml., 50c; Blbts., 10 for 1.00;
100 for 7.50.**

Grower's Unit: 2 Lge., 4 Med., 8 Sml., 100 Blbts., 13.00.

**HIGH FASHION (Baerman-Majeski '61)
460-90 days**

(Emperor x Maytime)

Another 66 inch variety which we had hoped to name "Skyscraper." Good lavenders are scarce and this clean true lavender self should prove an excellent cutter because of its exemplary habits. Fine propagator.

Lge., ea. 1.50; Med., 1.00; 1 Lge. and 50 Blbts., 8.00.
Grower's Unit: 1 Lge., 2 Med., 3 Sml., 50 Blbts., 10.00.

CREAMETTE (Staples '61) 210-70—

Seedling of Statuette—Very early

Show fans and commercial men alike will delight in this light cream miniature. Very early to bloom, the 3¼ inch lightly ruffled florets with slightly deeper cream throat makes it one of the best miniature prospects seen in some time. Creamette will hold 7 wide open florets, show 6 to 7 in color, and a like number of green buds, giving a well-balanced spike. Total plant height is 42" to 45" and flowerheads 21" to 23" long. Uniform in growth, it is a good producer of large bulblets which germinate nearly 100%. Florists like its exceptionally clean color, particularly for wedding work. Shown only twice, it was Best Seedling over all sizes at the N.E.G.S. Seedling Show at Medfield, Massachusetts last summer.

1—1.00 any size 1 Bulb & 10 Bulblets— 2.00
10—8.00 any size 10 Bulbs & 100 Bulblets—16.00

GOLIATH (Baerman '61) 534-85 days
(Royal Stewart x Southern Belle)

This enormous deep salmon pink was chosen Champion Seedling at the Western International Glad Show at Sumner, Washington, in 1960, and well it might, since its performance rivals even its size. We counted spikes with ten six-inch blooms open at once out of a total of 26 buds (many in color) with the entire row of large bulbs in bloom at once with ramrod spikes 66 inches tall. A natural for grand-champions at shows.

Lge., ea. 2.00; Med., 1.50; Sml., 1.00; 10 Blbts., 2.00.
Grower's Unit: 1 Lge., 2 Med., 5 Sml., 50 Blbts., 14.00.

GOLDFIND (Cotter '61)

Goldfind is a slightly ruffled medium yellow which grows up to 5½ feet tall. It has more than ample handle for cutting and makes up to 30"-32" heads of 20-22 buds with 8-9 open florets of good placement and spacing. Makes plenty of large bulblets which germinate readily. Very healthy and vigorous. It has received "B-plus" ratings at the N.E.G.S. Seedling Shows even from bulblet grown spikes. For a long time, we have been looking for a good commercial type yellow and feel confident we have found it in Goldfind.

Each—Any size, 3.00 or 1 Bulb and 10 Bulblets, 6.00.

SPECTACULAR 1960 INTRODUCTIONS

PINK FAVORITE (Baerman-Majeski-Weeks '60)

A row of Pink Favorite has the precise perpendicularity of a West Point dress parade. The massive 10 open deep pink or light red spikes are simultaneous bloomers. Every spike is a bouquet. Exceptionally fine cutter.

PINK PROSPECTOR (Baerman-Weeks-Majeski '60)
440—Midseason

The most beautiful flesh pink glad we know of. The glowing underlay of gold shines forth in the throat. Exquisite frilling adds great charm of form. Eight or more open blooms on fine stretchy heads make this a topmost beauty. A top seller.

LAVENDER FRILLS (Baerman-Weeks '60)
364—Early-Midseason

(Emperor x Innocence)

An arrangement glad par excellence with neat formal spikes holding 9 open. Florets are of heavy substance and lavishly frilled. A favorite with florists.

TOP BRASS (Baerman-Weeks '60) 416—Late
(Golden Sunshine x Prospector)

Medium deep yellow of heavy substance and graceful ruffling holding up to 9 open blooms on spikes totaling 20 buds. A very satisfying, well-mannered yellow that makes a fine cut flower. Not as ruffled as Topaz but larger.

Sensational Thrifty Buyers' Collections

For the past several years, these collections have been exceedingly popular. The demand has been so great and the satisfaction derived from them so much that we are again offering this planting stock at bargain prices. From unsolicited letters we have been informed how surprised they were not only by the size of the blooms but also by the fine large crop of corms harvested in the fall from these small bulbs (corms) and the fact that they were able to garner a large stock of name varieties. On late orders please name at least one extra variety we may substitute in case we are sold out of any variety ordered. All bulbs are No. 5 or No. 6 size as ordered.

YELLOWJACKET (316) (Baerman-Wagner 1961) (Sparkler x Ares) 85 days

The originator considers this one of his top introductions. With up to 12 intensely ruffled 3½-inch florets open at one time and with brilliant scarlet blotches enhancing the golden yellow color, it is as gaudy as a Roman holiday. The ribbony spikes are simply superb for arrangements. Yellowjacket has 24 buds, is 60 inches tall. Even large bulblets make beautiful spikes; picture shows a spike from a No. 6 bulb. Stock this if you want a show winner!

Any size, each 4.00. One bulb and 10 bulblets for 7.50. No bulblets sold separately.

EARLY SPRING (440) Baerman-Wagner 1960) (Innocence x Rosita) 65 days

This tall, fresh, cool light pink rivals Friendship in earliness and is more of a bridesmaid's pink. Cut flower growers who have seen this have been enthusiastic about its prospects.

Lge., ea. 50c; Med., ea. 35c; Sml., ea. 25c; 20 Blbts., 50c. Grower's Unit: 5 Lge., 6 Med., 10 Sml., 100 Blbts., 9.00. Grower's Unit: 1 Lge., 2 Med., 6 Sml., 100 Blbts., 3.50.

SNOWSTORM (Baerman-Majeski '59) 400-85 days
(Sister of Emperor x Evangeline x Snowbank)

Our picture of this waxiest of whites is so accurate that a description is superfluous. Snowstorm is a fancier's flower which responds to good culture. Lovely this past summer.

Lge., ea. 50c; Med., 35c; Sml., 25c; Blbts., 15 for 75c;
100 for 4.00.

VIOLET QUEEN (Baerman-Weeks '59) 476-70 days
(Admiral x Caribbean)

This is much bluer than our picture, resembling the deep blue-violet of certain petunias. An easy and rugged grower. You will relish the strong note of color contrast which this rich, cool, deep violet brings to your gladiolus planting.

Lge., ea. 50c; Med., 35c; Sml., 25c; Blbts., 15 for 75c;
100 for 4.00.

Grower's Unit: 5 Lge., 6 Med., 10 Sml., 100 Blbts., 9.00.

CHEMAWA (Baerman-Weeks '59) 486-75 days
(Innocence x Southern Belle)

Many fanciers consider this the finest smoky in commerce. Velvety, rich old rose with an ivory throat, its superb ruffling and stretchy flowerheads make this a topmost beauty. At its modest price you can enjoy a generous planting of Chemawa. It's far superior to its picture.

Lge., ea. 25c; 5-1.00; Med., 20c; 5-80c; Sml., 5-50c;
Blbts., 100 for 2.00.

SUNBURST (Baerman-Majeski '59) 434-75 days
(Royal Stewart x Pactolus)

Tricolors are the newest thing in glads. Here is one of rich, ruffled salmon pink surmounted by a brilliant explosion blotch of velvety scarlet and bright canary yellow. This was outstanding with us last season.

Lge., ea. 50c; Med., 35c; Sml., 25c; Blbts., 15 for 75c;

Grower's Unit: 5 Lge., 6 Med., 10 Sml., 100 Blbts., 9.00.

EIGHTH WONDER (Baerman-Majeski '59)
466-70 days

(Emperor x Unknown)

One of the very few glads to win a "AA" rating at the Ohio Trial Grounds at Vallevue (i.e., "A" as a cut flower and "A" as an exhibition variety.) Every spike is a bouquet. Much earlier than Emperor.

Lge., ea. 50c; Med., 35c; Sml., 25c; Blbts., 15 for 75c;
100 for 4.00.

TOPAZ (Baerman-Weeks '59) 416-85 days
(Golden Sunshine x Prospector)

A connoisseur's yellow with such an intricate lacy frilling that it sparkles like a jewel. 20-22 buds; 7-8 open; nice long heads. A very high class yellow.

PLEASE READ CAREFULLY BEFORE ORDERING

MAKING OUT YOUR ORDER. Please put everything down on the order blank just as listed in the catalogue. After adding them up, figure your bulb discount and add on the extra bulbs of your choosing.

DISCOUNTS AND EXTRAS. On all cash orders from the **RETAIL** descriptive list of \$5.00 to \$10.00 you may select 10% extra in bulbs of your own choosing. From \$10.00 to \$20.00 you may select 15%; all over \$20.00 select 20%. Discounts do not apply to Collections, Special Offers, Wholesale Orders or 1960 Introductions from Birchville Gardens or from other growers or originators.

MINIMUM ORDER. Due to the continued rise in general, we will be unable to accept orders for less than \$3.00. No orders will be accepted for less than the smallest unit listed in the retail list for each variety, except that when the smallest unit is ten, five bulbs will be sold at one-half the ten rate. Where bulbs are priced singly, ten bulbs will be sold for the price of eight.

SHIPMENT. Unless otherwise requested retail orders will be sent out between March 1 and April 1 or sooner, if weather permits. Wholesale orders will be shipped as soon as possible after receiving them. All retail orders will be sent prepaid to all points in the United States.

F.O.B. ITEMS. If your order contains both f.o.b. and retail items, we will ship them together in one package f.o.b. but will give enough overcount and extras to more than offset the carrying charges on the retail items.

SUBSTITUTIONS. We will not substitute varieties or size unless your order specifically instructs us to do so. It is advisable to specify a second choice of variety or size, particularly if your order is placed late in the season.

SIZE OF BULBS. L indicates large size bulbs measuring more than 1¼ inches in diameter. M is a medium size bulb, ¾ to 1¼ inches in diameter. S indicates a small bulb, under ¾ inch in diameter. Blbts. stands for bulblets. You will get best results from the large bulbs. They will produce the best show spikes. Medium size bulbs will often produce show quality spikes, and will produce good saleable spikes. Small bulbs will in most cases bloom—the spikes they produce are not top quality, but you will get a large bulb to grow next year; they also produce quite a few bulblets.

GUARANTEE. We make every effort to keep our stock true to name and free from disease and insects. Please open the package immediately upon receipt, examine carefully, and if not satisfactory, advise us at once. All of us make errors once in a while and if any of the bulbs are found to be not as represented, we shall either refund your money on their return, or we will replace the unsatisfactory stock. However, we can at no time be liable for more than the original amount paid for the bulbs. All orders are placed with this understanding. All stock has been state inspected.

THE GLADIOLUS CLASSIFICATION SYSTEM

The number after the name of each variety in our general descriptive list denotes the official size and color classification of that variety as determined by a committee of the North American Gladiolus Council. We list these classification numbers because they are helpful to customers in determining the exact size and color classification of varieties they may want to buy or to exhibit at glad shows conducted under the auspices of the N.A. G.C., where this classification system is used.

Glad's are classified in five sizes as follows:

Miniature Glads 100—Florets under 2½ inches
Small Glads 200—2½ inches up to 3½ inches
Medium Glads 300—3½ inches up to 4½ inches
Large Glads 400—4½ inches up to 5½ inches
Giant Glads 500—5½ inches and larger

For instance, the second variety shown in the alphabetical list, Albert Schweitzer, is followed by the number 436. The 400 means it has a floret size from 4½ inches through 5½ inches. The 36 designates this variety as a scarlet.

Hence the numbers after the variety names tell the story of the size and color of the individual floret as grown under field culture from large bulbs. An odd number as the last digit denotes a conspicuous marking. Thus Albert Schweitzer, 436, is a scarlet without markings; while Balalaika also a scarlet, 437, has prominent markings.

COLOR CLASSES:

00 White	00 Without consp. mark	46 Red

Yellow	14 (Light)	Rose

General List of Recent Introductions

All our bulbs are plump and healthy. Small bulbs usually produce blooms late in the season. Bulblets seldom bloom the first year and a small percentage always fail to germinate—the rest mature mostly into medium and small bulbs. Large bulbs always produce the finest exhibition spikes and sometimes throw several spikes from the bulb. Medium sized bulbs give excellent spikes particularly when planted early in the season. Small sized bulbs can produce good spikes and, as a rule, seldom give much more than medium sized spikes, but produce large bulbs for the following season.

Large bulbs are 1¼ inches in diameter or over; medium are 1 inch to 1¼ inches; and small bulbs are ½ to ¾ inch. L=large, M=medium, S=small, blbts.=bulblets.

MOZART (Europe)

This throws a rather tall spike that nestles 7 to 9 well placed 5 inch blooms whose color is geranium red accentuated by a rose-red blotch. Mozart should be outstanding both as a commercial and for exhibition.

Clean velvety dark red with a cream line on lower petals. Opens 8 to 10 wide open flaring florets on a spike of 20 to 22 buds. Makes huge spikes up to 65 inches with 30 inch flowerheads. Probably the best of the dark red varieties.

(S 1-.25; 10-2.00) (Blbts. 8-.25; 100-2.50)

PARAGON (White '56) 414-100

PARTY RUFFLES (Rich '57) 410-80

A beautiful dream of very heavily ruffled cream, with a suspicion of pink showing thru the petals, like a pink slip showing a hint of color under a girl's ruffled, frothy, party dress. It will open 8-9 of its large lovely florets at a time on fine sturdy spikes. A great prospect for show and commercial. It already has an outstanding show record.

PEACH FESTIVAL (Miller '59) 541-90

A large buffy peach-pink, Peach Festival throws tall spikes on which are 10 well placed open florets with extremely heavy ruffling and substance making this variety the ultimate in the ruffled type. It is a good producer of bulblets that are not only easy to germinate but grow into large bulbs as well. In 1959 Peach Festival won Grand Champion at Boston, a Section Champion, and at least 5 other Blue Ribbon Awards on a very limited distribution of bulbs.

REDCOAT (Jack '57) 446-85

Bright ruffled light red carrying up to 25 buds with 8 open. A vigorous grower from all size bulbs. Redcoat could well become a leading cut flower. Don't miss out growing this lovely red.

(L 1-.25; 10-2.00) (M 1-.20; 10-1.60)
(S 2-.25; 10-1.00) (Blbts. 15-.25; 100-1.00)

REMBRANDT (Howell '59) 387-78

An excellent mahogany colored smoky. A good spike can always pick up a blue ribbon. The basic color is reddish brown with a smoky plum overcast and a bright red spot in the throat. Tall thin spikes of 22 buds with as many as 9 to 10 open at once. An easy grower and a good propagator. No short or stubby spikes.

(L 1-.50; 10-4.00) (M 1-.40; 10-3.20)
(S 1-.25; 10-2.00) (Blbts. 10-.40; 100-3.50)

It has good facing and placement on a 54 inch straight, sturdy stem. The tip of each cut spike remains erect and blooms out perfectly. Bulblet production and germination are excellent. We do not hesitate to recommend it as a worthy addition to the Glad Fraternity.

(S 1-.25; 10-2.00) (Blbts. 10-.40; 100-3.00)

RIXEY (Kroon '59) 511-95

By far, one of the most sensational glads developed to date. It is a good grower, exceptionally strong with tall, straight spikes with up to 22 buds. Eight or more heavily ruffled six inch florets open at a time. Its elegance and wonderful substance, coupled with its lasting qualities and cut flower habits, make this glad a joy to growers and the flower trade. Rixey is a very beautiful soft cream with a deeper cream slightly darkening to yellow in the throat. Actually, a very gorgeous and pleasing color.

(S 2-.20; 10-.80) (Blbts. 25-.25; 100-.75)

SALMON QUEEN (Schrenck '55) 534-80

Color is a clean, medium salmon with a cream throat. It will open 8 or 9 of its large, well attached, lightly waved florets in perfect placement on heads of 30 inches. Spikes are perfectly straight. One of the best show varieties.

SANTA FE (K&M '57)

A very fine deep scarlet that opens 7 to 9 large florets on tall straight spikes. The fact that this variety is very early blooming makes it attractive to cut flower growers. We feel it can also win at the shows.

(L 1-.25; 10-2.00) (M 2-.30; 10-1.20)
(S 2-.20; 10-.80) (Blbts. 15-.25; 100-1.00)

SARANAC (Rupert '58) 370-70

A very fresh clear, light violet 45 to 50 inches tall having 20 to 22 buds with 6 open. (L 1-.20; 10-1.60) (M 2-.30; 10-1.20)

SHAMROCK (Howell '57) 404-70

A light yellow, tinted light green with green buds. As many as 10 florets open and has a flowerhead of about 30 inches with 20-21 buds. This has the cleanest color, is the healthiest and one of the best green glads. Women love it for arrangements. Good commercial prospect as it is very early.

(L 1-.25; 10-2.00) (M 2-.30; 10-1.20)

(S 1-.50; 10-4.00) (Blbts. 5-.25; 100-4.00)

SUGAR ELL (Vennard '59) 434-95

A fiery salmon or coral color, with 19 or 20 buds, 5 inch florets, and spikes that will reach to a man's eyebrow without special attention. We make no strong claims that this glad will win in any show or in any particular competition; but we do contend that it is especially fine as a cut flower and for bouquet, basket or vase use. It will open from tight bud and keep perfectly for several days. It blooms late, coming along when many other glads are gone and continuing to bloom until frost stops it. Makes excellent spikes from fives and sixes. A very strong healthy grower that makes bulblets liberally that are easy to grow.

(L 1-.25; 10-2.00) (M 2-.30; 10-1.20)

Its long massive spike has a 30 inch flowerhead bearing 20 buds. The florets are slightly ruffled with 7 to 8 open at one time. Excellent for exhibition or cut flower use. Healthy and an excellent propagator. Makes saleable blooms from early planted bulblets. Blooms midseason to late.

(L 1-.60; 10-4.80) (M 1-.40; 10-3.20)

VANITY FAIR (Holland) 490-80

Very unusual smoky, a deep brown or garnet with white veins. Good tall grower with 6 to 8 open. There is nothing else like Vanity Fair and I recommend you try this if you like smokies.

(L 1-.25; 10-2.00) (M 2-.30; 10-1.20)

Standard One Price Varieties

The following popular varieties contain the best of the proven exhibition and commercial types and are being grouped at one standard price to enable our customers to select these varieties without looking up prices separately. Cost is no criterion of the charm and beauty of a *Gladiolus*. In most cases prices are not reduced to this low level until the variety has proven its worth. We don't offer a variety solely because it is new and the price is high; neither do we drop one from our list because it reaches a low-price field. What we do offer is potential beauty, in bulbs of such health and vigor, that you may confidently expect to realize in your garden the possibilities that have already made you a Glad Fan.

Large Bulbs 2 for .35; 10 for 1.30; 25 for 2.60
Medium Bulbs 3 for .30; 10 for .85; 25 for 1.70

Small Bulbs 10 for .40; 25 for .80
Bulblets: Pkg. of 50 or more .40

The 10 for \$1.30; and 25 for \$2.60 prices are applicable to one individual variety, not to different ones priced alike. No order accepted for less than 2 large, 3 medium, or 5 small bulbs of any variety.

A. B. COUTTS (Coutts '53) 520-85

A very vigorous giant apricot buff blending to deep yellow in the throat. It will consistently throw heads well in excess of 30 inches. Spikes are tall and straight carrying 22 to 24 buds, opening 8 with 8 or more in color. The 6½ inch florets are well placed and attached. Propagation is excellent and makes clean bulbs.

ACE OF SPADES (Sisson '50) 458-85

One of the darkest of the black reds. Clear glistening deep black with silky sheen and buds of jet black. Opens 4 or 5 large very nicely waved and ruffled florets on tall spikes. Very popular with those who like the dark ones.

ADORABLE (K&M '54) 550-80

An utterly charming sulphur cream shading to an amber with a creamy throat blotch. Blooms are slightly ruffled and buds are greenish. These greenish buds and deep cream blooms produce a very beautiful color effect. It opens eight on a very tall stem. Good placement and attachment of its 20 buds. This is the best real cream variety we have seen.

AFRICA (K&M) 580-80

If you can visualize this—a brown granite color with a geranium red base — then you will agree it is somewhat an unusual glad. The spikes are good and on them open 6 well-placed florets. No reason why it shouldn't win in its color class. You better try Africa for it is an interesting novelty.

ALLAH (Harris '53) 491-80

A new dark smoky with very large florets. A larger, richer and much improved Vagabond Prince. Ruffled and needle pointed. Grows up to 50 inches tall with 8 open on a 20 bud spike.

ALLEGRETTO (Preyde '56) 436-87

Vermilion red with scarlet stripe. This glad has the finest red color we have seen in a glad and should become a leader in the cut flower field. Opens up to 8 on a tall 20 bud spike.

ANDRENA (Armstrong '50) 450-85

This is certainly one of our most beautiful glads. A lovely light orchid with a large creamy white center. It opens 7 or 8 ruffled florets of good size on sturdy straight spikes. Propagation and germination are very good.

ARISTOCRAT (Salman '50) 464-85

Here is a sure winner in its class. A huge purplish wine-red that opens 6-8 on very tall spikes. This is the tallest glad we have. Has leathery textured florets. A must for all show fans. Very healthy bulb producer.

ATATURK (Salman '51) 354-75

A very deep black-red with velvety glow—almost black in full sunlight. It is certainly one of the best in this color. It grows tall with 6 open florets. Visitors to our gardens like this one.

BACK JOE (Flad '54) 554-70

The imperial potentate of your glad garden. You will find Black Joe to be early on the job with its 20 buds and 8 florets opened which are splendidly ruffled. A rather unusual dark red with a fluorescent overtone and a silver edging. Does not sunburn and is one of the finest earlies. We rate this highly.

BLACKPOOL (Visser '54) 458-80

Clean black red with excellent color value. A very nice glad with tall straight spikes. Opens 7 on a 20 bud stem. Strong grower and propagator. Very healthy and a good exhibition variety.

BLUE CONQUEROR (Salman '55) 471-80

This deep blue gladiolus can be regarded as an excellent improvement in this class. Opens 10 on good strong spikes. With its fine color and good stem this is the finest in its class. It is a wonderful show glad and should become a good commercial.

BLUE GODDESS (K&M '55) 471-75

Here is one of the clearest blues growing today. Opens 6-8 blooms on tall stems carrying 20 buds which is rare in blue glads. Strong healthy grower. BOISE BELLE (Roberts '48) 433-98

A unique novelty and show glad that is distinctly different. One of my favorites. Opens up to 10 very heavily ruffled florets that have a leathery texture. Medium pink at the edges blending to a light yellow throat. A champion at shows and a wonderful cut flower.

BOW-BELLS (Medford '57) 400-65

A superlative white sport of Friendship that is even better in its color class than Friendship is in the pinks. It is very early, opens 6 to 8 well placed florets on tall spikes. A terrific commercial.

CABALLERO (Fairchild '55) 426-85

Really an eyecatcher, and one you will not want to pass up if you enjoy vivid, stunning color contrasts. A brilliant reddish orange with a striking red throat marking and bordered yellow on lip petals and midribs. Opens 7-8 good sized well placed florets. Nothing else like it.

CALICO (Fischer '57) 451-75

A pretty thing, this Calico. A rather attractive variety, particularly to glad fans who like their glads in the unusual colors. The florets are nicely ruffled, light rose with deep red blotches. Eight of these open on an ideal spike.

MESA MIST (Hartman '52) 486-85

In the arrangement to the left, the yellow variety is Conrad; the pink, Boise Belle; and the smoky at bottom center, Prunella. Foliage in back are Canna leaves and at bottom with berries, English Hawthorn. The container and arrangement both made by Andy Bell; and incidentally, the container was fashioned from old pecky cypress wood.

Midgets and Moppets

In the past few years there has been a decided increase in the interest shown in miniatures. There are probably several reasons for this, but we think the most important is that miniatures are the perfect home arrangement flowers. More florists and home arrangers have come to see the value of this type for small arrangements. They are unsurpassed in making up table decorations. Their grace and delicacy, as well as small size, make them the perfect flowers for bridal bouquets, cascades, corsages, mantle pieces and other dainty arrangements where larger varieties would be out of place.

ALECIA (MacPhail '54) 200-60

One of the very best white miniatures. Alecia is pure white even to the stamens. Opens 5-6 well placed blooms on a spike of 16 buds. A prize winner that will be in big demand.

Queen of the small glads! It is buff pink with a yellowish throat faintly dusted with red. Very early, deeply ruffled and heavy substance. Grows up to 50" with a 17-18" flowerhead carrying 16 to 18 buds with 6 open. You will love Bo-Peep.

BREAD & BUTTER (Kroon '60) 210-75

Immaculate white with a golden yellow throat. The tiny florets of heavy substance are ruffled and recurved. On its graceful stem 6 florets open at once. Supremely beautiful and ideal for arrangements.

(S 1-.50; 10-4.00) (Blbts. 10-.40; 100-3.50)

BROWN ORCHID (Van Voorhis '40) 396-85

(S 3-.25; 10-.70) (Blbts. pkg. .40)

CAMELOT (Larus '59) 244-70

One of the best new miniatures. Has all the good growing habits of Parfait but opens more—up to 11. Color is a medium pink blending to a yellow throat. Makes tall spikes with 23 buds. The grace and beauty of Camelot will please any miniature fan, even the most fastidious one.

(L 1-.40; 10-3.20) (M 1-.30; 10-2.40)
(S 1-.20; 10-1.60) (Blbts. 10-.25; 100-2.00)

CARVED IVORY (Fischer '56) 310-80

One of the most beautiful cut flower varieties to date and also an excellent show glad. Opens 7 of its 17 buds on a fine and well proportioned head. Its cream color is one of warmth and its ruffling is exquisite. Wonderful for arrangements.

(L 1-.20; 10-1.60) (M 2-.30; 10-1.20)
(S 2-.20; 10-.80) (Blbts. 25-.25; 100-.75)

CHOCOLATE CHIP (Fairchild '58) 296-75

A real dark brown glad in the style of Atom, even to the hairline silver edging. Has been extremely healthy and a vigorous grower, producing plenty of easily germinating bulblets. Opens 6 or 7 florets in typical miniature placement on slender stems with a head length of about 19". We consider this a great improvement over Spunky, the leader in its class.

(L 1-.25; 10-2.00) (M 2-.30; 10-1.20)
(S 2-.20; 10-.80) (Blbts. 25-.25; 100-.75)

CINDY (Kroon '60) 214-80

A very beautiful and striking shorty with a lovely color of light yellow and a bright broad picotee orange edging, extending to the tips of the slightly frilled florets. Opens 6 to 7 on its neat graceful stems.

(L 1-.30; 10-2.40) (M 1-.20; 10-1.60)
(S 2-.25; 10-1.00) (Blbts. 10-.30; 100-2.50)

CLAUCARCY (Maynard '52) 241-87

Nice shade of light pink with cream throat and white mid-ribs. Up to 20 buds with 6-7 open and 6 in color. This won consistently high ratings at 4 trial gardens in 1951.

(L 2-.35; 10-1.30) (M 3-.30; 10-.85)
(S 5-.30; 10-.50) (Blbts. pkg. .40)

CRINKLETTE (Butt '41) 226-70

Deep orange, set off with a creamy light yellow throat. Holds 5 open, five in color and six buds on medium tall spikes. Dainty and nice.

(L 2-.35; 10-1.30) (M 3-.30; 10-.85)
(S 5-.30; 10-.50) (Blbts. pkg. .40)

CUPID (Fischer '49) 300-60

Its nicely ruffled florets and waxy sculptured form will endear this creamy throated white to home gardeners and florists. Excellent as an early cutflower.

(L 2-.35; 10-1.30) (M 3-.30; 10-.85)
(S 5-.30; 10-.50) (Blbts. pkg. .40)

DAINTY MISS (Stancer '41) 240-80

Light pink with a cream throat, typical miniature in performance. Color is nice, blending well with other colors. Very exceptional for corsage and arrangement work and one of those you like the minute you see it.

(L 2-.35; 10-1.30) (M 3-.30; 10-.85)
(S 5-.30; 10-.50) (Blbts. pkg. .40)

DIMPLES (Rohrbach '58) 340-85

Of the many better known introductions the past several years, none are quite as beautiful, in our opinion, as Dimples. The nicely ruffled florets are a clean medium salmon pink shading to a cream yellow throat with a small red blotch. Opens 6 to 8 perfectly placed 3 1/4 to 3 1/2 inch florets on tall spikes with 18 to 23 buds. Really, a sensational show miniature.

(L 1-.35; 10-2.80)
(S 2-.30; 10-1.20)

(M 1-.25; 10-2.00)
(Blbts. 10-25.; 100-2.00)

DONDI (Kroon '58) 320-70

Beautiful orange salmon-buff with rose blotching plus some yellow at base of blotch. It has a slender whip-like stem, having 18 buds with 7 to 8 well placed florets opening at once. At the Pacific International Show at Grant's Pass, Oregon, this attracted a great deal of attention and was awarded the American Home Achievement Award. Dondi is superb in the garden and exquisitely beautiful for arrangements. Good propagator and bulblets germinate easily and is a healthy variety.

(S 2-.20; 10- .80)

(M 2-.30; 10-1.20)
(Blbts. 15-25; 100-1.00)

EMILY'S BIRTHDAY (Butt '55) 235-70

The earliest blooming variety we have ever grown. Opens 5 to 7 on a slender 17 bud spike. Florets are ruffled and measure 3 inches. The color is salmony orange with a yellow throat. Will fleck some under adverse conditions.

(L 2-.35; 10-1.30)
(S 5-.30; 10- .50)

(M 3-.30; 10-.85)
(Blbts. pkg. .40)

FAIRY (Kuhn '46) 260-75

Beautiful light lavender. Holds 5 to 7 open on tall wiry spikes. Color is nearly uniform and is a shade that blends well on most any place you use it. Attractive and quite popular.

(L 1-.35; 10-1.30)
(S 5-.30; 10- .50)

(M 3-.30; 10-.85)
(Blbts. pkg. .40)

FALINE (Dirk Kroon '56) 314-75

An outstanding mighty fine addition to the miniature class. A very beautiful round flaring light yellow with deeper yellow blending throat, slightly ruffled and will open 7 with 5 showing color on a well balanced formal forty inch 17 bud spike. Substance is very good and foliage always green. Makes clean, healthy bulbs and is an excellent propagator. We might say it's a miniature Prospector, one of the most beautiful of all varieties. One of the outstanding introductions of 1956.

(L 2-.35; 10-1.30)
(S 5-.30; 10- .50)

(M 3-.30; 10-.85)
(Blbts. pkg. .40)

FLASHLIGHT (Roberts '53) 337-70

Flashy salmon-scarlet with a large clean-cut bright yellow throat. There is no other glad just like Flashlight. It rated third most popular glad of all sizes in last year's Popular Gardening Symposium. Grow some and see why!

(L 1-.20; 10-1.60)
(S 2-.20; 10- .80)

(M 2-.30; 10-1.20)
(Blbts. pkg. .40)

FROLIC (Bork '53) 317-80

Spectacularly blotched small yellow. Opens 5 informally placed florets on head of 15 to 17 buds. Large bulbs will produce up to 3 graceful spikes. One of the better new miniatures. A knockout for arrangements.

(L 2-.35; 10-1.30)
(S 5-.30; 10- .50)

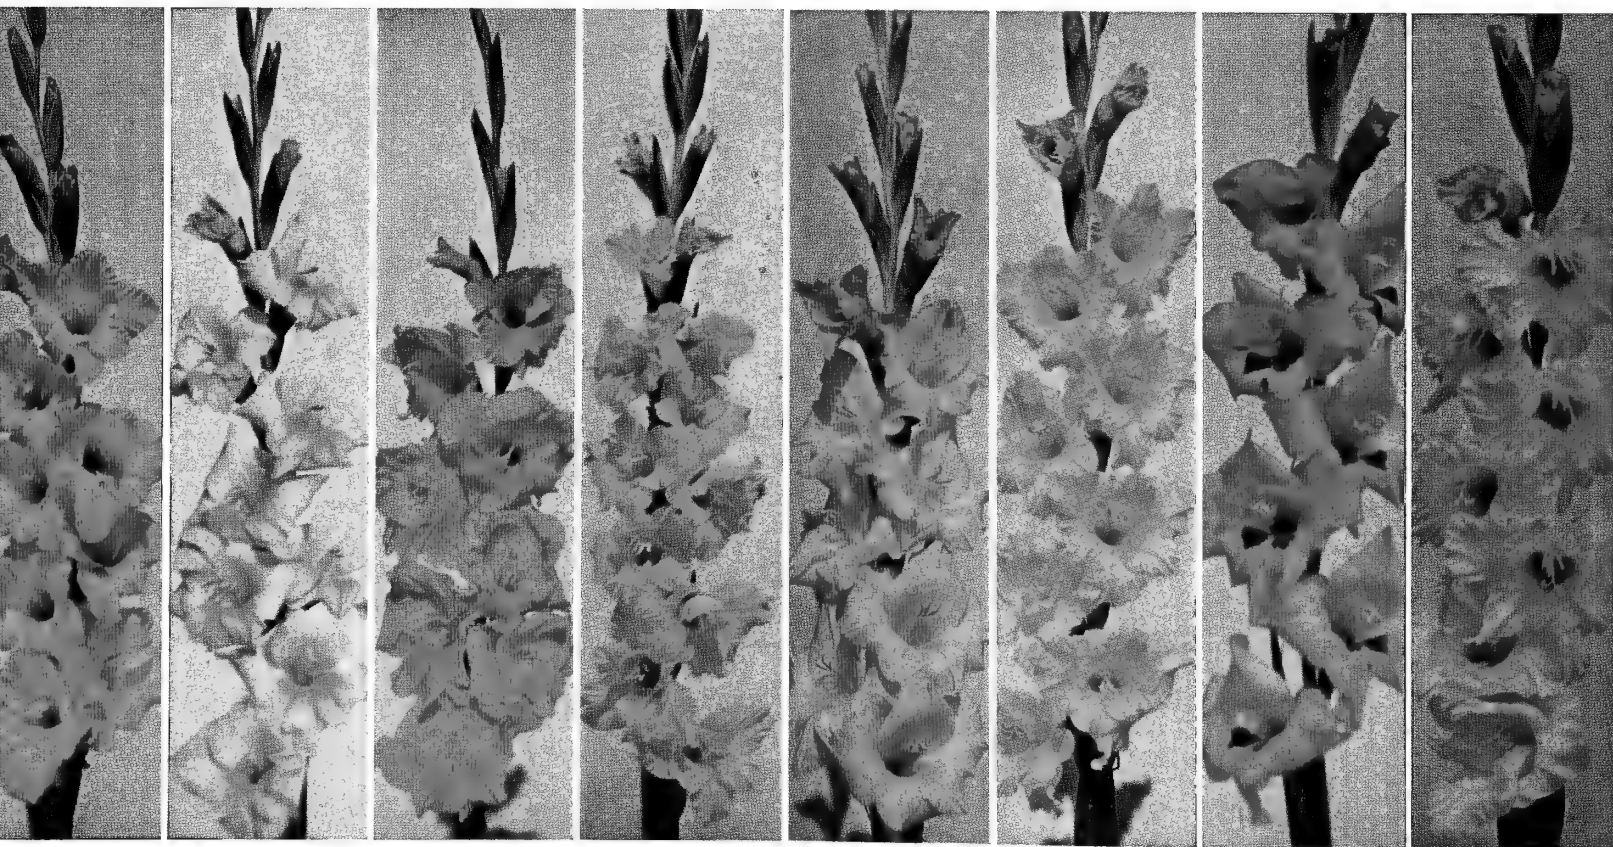

(M 3-.30; 10-.85)
(Blbts. pkg. .40)
